Interpretable models, leave-one-person-out (* finalist)
Probability quality
first-half yaw > 0 (no training)
first-half yaw sign, hit rate as P *
first-half yaw, fitted threshold
best single-feature rule (in-fold choice)
logistic: first-half yaw
logistic: yaw at 25/50/75/100 %
logistic: yaw + roll + lateral (PHYS6)
PHYS6, asinh-compressed tails
PHYS6, data treatment chosen in-fold *
PHYS6 + even descriptors, unconstrained
PHYS6 x log(duration, peak speed)
logistic: forward selection (in-fold, <= 4)
temporal filter: yaw rate
temporal filter: yaw + roll + lateral
shallow tree (depth <= 3)
GAM on PHYS6 (splines) *
reference: yaw logreg (8 instants)
