Deep architectures
1D CNN
1D CNN, antisymmetric
ResNet1D
InceptionTime-lite
GRU
TCN
Deep: data treatment
1D CNN, gravity + body frame (12)
1D CNN, all 17 channels
1D CNN, per-trial amplitude
1D CNN, fixed 3-s window
1D CNN, chiral channels
1D CNN, no scaling
1D CNN, no augmentation
1D CNN, mirror only
1D CNN, robust scaling
1D CNN, global-average head
Deep: body-frame re-checks
1D CNN, body frame, per-trial amplitude
1D CNN, body frame, antisymmetric
1D CNN, body frame, fixed 3-s window
Deep: grip transfer
1D CNN, gravity + body frame, trained on upright grips only
1D CNN, all 17 channels, trained on upright grips only
Deep: nested choice
deep, grip-invariant configuration chosen in every fold
deep, configuration chosen in every fold
deep, architecture chosen in every fold
MiniRocket
MiniRocket, per-trial amplitude
MiniRocket, chiral channels
MiniRocket, antisymmetric
MiniRocket + logistic
Time-frequency
2D CNN on STFT (signed)
STFT signed + logistic
CWT signed + logistic
STFT magnitude + logistic, no mirror
CWT magnitude + logistic, no mirror
STFT magnitude + logistic
CWT magnitude + logistic
