a Model-free (standard-variant trials)
b Headline logistic regression
peak linear speed
angular-speed peaks
SPARC
log dimensionless jerk
peak angular speed
mean angular speed
yaw path
absolute net yaw
linear path length
peak linear acceleration
angular path length
mean linear acceleration
net tilt
time of the angular-speed peak
tilt path
duration
fast - natural
slow - natural
−0.5
0.0
0.5
1.0
Within-person difference of medians (SD)
−6
−4
−2
0
2
4
LR log-odds per SD (mean, range over folds)
